<<< SCARBOROUGH REEF 2007 >>>

At 6 UTC on 25 April, the BS7H team left Hong Kong harbour on a 60-hour voyage to Scarborough Reef, from where they intended to be QRV for 9 days. However, at 02.40 UTC on 27 April the team was located approximately 240 nautical miles north west of the reef and making less than the expected progress because of extremely rough seas. Current estimated arrival to BS7 is their Sunday morning local time. Because of rough seas, there has been no maritime mobile operation. The announcement that they have commenced radio operations will appear on the expedition's website (www.bs7h.com). The roster includes eighteen operators:

Chen Peng, BA1HAM	Tom Berson, ND2T
Fan Bin, BA1RB	Joe Blackwell, AA4NN
David Chen, BA4RF	Paul Pescitelli, K4UJ
Chen Fang, BA4RC	Mike Mraz, N6MZ
Terry Liang, BA7NQ	Mike McGirr, K9AJ
Ko Chih-Ta, BV6HJ	James Brooks, 9V1YC
Eddie Valdez, DU1EV	Martti Laine, OH2BH
Jun Moreto, DU1BA	Massimo Mucci, I8NHJ
Bob Vallio, W6RGG	Christian Entsfellner, DL3MBG

Scarborough Reef has unique and dangerous attributes, and as such BS7H will not have online logs or pilots. All efforts are on keeping the team safe so they can provide a new one to as many hams as possible. QSL via KU9C. Jose, CT1BOH has created a set of interactive propagation maps for BS7H. Select a time and frequency, and the corresponding propagation map will be displayed. The maps are accessible at <http://www.qsl.net/ct1boh/propagation.htm>

3B7C ---> Plans for the Five Star DXers Association's 7-24 September DXpedition to St. Brandon [425DXN 822] are progressing well. A suitable boat has been chartered to take the team and its 6 tonnes of equipment to the island, the licence has been received, and all permits are in place. The team will be operating from Isle du Sud, the southern end of what is shown on the charts as Cocos Island. Some of the previously-announced members have had to drop out of the expedition. The team now includes 9M6DXX, DK7YY, DL7AKC, EI5DI, G0OPB, G3BJ, G3IZD, G3NHL, G3NUG, G3SVL, G3USR, G3XTT, G4TSH, GM3POI, K3NA, MD0CCE, N6HC and SM5GMZ. The full Press Release no. 4, issued on 24 April, is available on the expedition's website, which is now up and running at <http://www.3b7c.com> [TNX G3XTT]

HS0ZCW ---> Charles, HS0ZCW (K4VUD) will have an antenna (a sloper pointed north) for 80 metres and is asking for direct replies to sked suggestions. The skeds must be on Thailand weekends (Thai amateurs cannot operate this band unless there is a contest running, and contests are almost all only on weekends). Thailand is UTC +7 hours. The frequency must be between 3500 and 3535 kHz. Feel free to e-mail him suggestions of skeds (k4vud@hotmail.com).

J5BI ---> Jack, F6BUM reports that his recent J5BI operation from Bubaque Island (AF-020), Guinea-Bissau has been approved for DXCC credit.

JT1Y ---> Andrea, IK1PMR and Claudia, IZ1GLO (K2LEO) went QRT at 11.09 UTC on 24 April and left Mongolia on the 25th. They made over 4,000 QSOs (600+ RTTY, 39 SSB, all others CW) on 160-12 metres, and their logs are already available on line (www.ik1pmr.com/logs/). Please note that the other JT1Y station (operated by I0SNY, I5NOC and I8YGZ) has paper logs, and those QSOs are not

online. [TNX IK1PMR]

PIRATE ---> Pasquale, IW0HEX reports that his callsign has been repeatedly pirated on the PacketCluster.

QSL CN3A & 5D5A ---> Roberto, I2WIJ reports that "the CN3A direct QSL requests backlog has been cleared, and all the cards are in the post mail". From now on, new requests for CN3A will be answered once a week. The 5D5A direct QSL requests backlog will be processed starting on 2 May.

QSL VIA VK4AAR ---> Alan says that one USD no longer covers return postage from Australia to any part of the world. One Euro does, but "do not send coins!", Alan says, because "banks only accept and exchange paper money". Alan is the QSL manager for 9V0A, 9V1DX, KH2VM, P29RH, V63PD, VI0ANARE, VK0MM (Macquarie), VK6AN (OC-266), VK6BM (OC-234), VK6BSI (OC-243), VK6DHI (OC-206), VK6LI (OC-071), VK8AN/6 (OC-154), VK8AN/8 (OC-229), VK8AV/3 (OC-136), VK8DP, VK8MI (OC-173) and VP2V/W3HQ (the logs for C21RH, VU3RSB, YJ8AA, ZK2JJ and ZK2PJ are now closed).
